

# Safety.

It's everyone's responsibility.

As health care professionals, you have a responsibility to your patients, your co-workers and yourselves to keep safety top of mind with every action you take. The potential risks to your own safety can come in many forms:

- Safe patient handling and mobility
- Combative patients
- Repetitive motion injuries
- Slips, trips and falls
- Occupational diseases
- Manual material handling

No matter your role, you play a vital role in ensuring you and your co-workers follow proper safety protocols in any situation that arises.
