

Risk Connection and Web Resources

United Heartland Loss Control representatives provide our customers with hands-on consultation, as well as a variety of resources to complement our meetings with you. You may register at our website to receive email notifications on safety topics related to health care and other areas. Our website also contains links to additional SPHM resources that you may find helpful.

Risk Connection

Risk Connection is a means of offering important safety information to policyholders throughout the year. These monthly e-blasts contain general and industry-specific safety information for subscribers.

Risk Connection also contains a "Forward to a Friend" feature, so you can share safety information with co-workers and employees with a simple click. This is a great tool, free of charge and a good way to get regular safety communications to your various departments and staff.
