

Care Analytics®:

Effective Solutions for Injury Management

Occupational medical providers identified by Care Analytics® average 12% less in medical costs than other providers.

The United Heartland Solution

Care Analytics® is our state-of-the-art platform that combines data analysis, best practices in medical management and effective partnerships with experienced medical professionals to return your workers to health and to work quickly.

Guided by data we've gathered in partnership with Johns Hopkins University, a nationally-renowned research institute, we're also leading the way toward breaking the cycle of opioid abuse when treating chronic pain.

By partnering with United Heartland, you'll benefit from tools like Care Analytics® to help guide your injured workers through the recovery process. Our resources and experts will:

- Connect injured workers with physicians who are knowledgeable in occupational medicine.
- Conduct prompt discovery and early intervention on concerning prescribing patterns.
- Educate treating providers on the long-term effects of the medications they prescribe.
- Correct the course of medical care to help achieve the best recovery results for the injured worker.
- Monitor medical and pharmacy bills in real time.

The outcomes we're achieving with the innovation of Care Analytics® are making a difference in helping our customers sustain a healthier workforce while lowering costs. To learn more about how this and other programs can help your business, contact us today at 800-258-2667.
